Predecessor	Final v1.0 - private locked predecessor; preserved unchanged
Public-edition rule	Final v2.0 is the sole public canonical edition; public repository registration remains pending.

Scope and boundaries

Final v2.0 is a separate post-v16 independent publication and does not modify Master Hash Manifest v16.0 FINAL, Coexilia, the Structural Penalty Proofs, The Structural Preference for Peace, Arweave Layer 1, Arweave Layer 2, or the future optional Open Coexistence Accord.

The work is conditional, non-binding, non-operational, non-authoritative, and advisory only.

The lock creates no treaty, governance authority, access right, control right, preservation mandate, benchmark, runtime guardrail, safety certification, or evidence of acceptance by any AI, AGI, ASI, person, laboratory, or institution.

All completed review was AI-assisted. No independent human peer review, academic validation, institutional endorsement, or empirical parameter validation is claimed. The lock records the author's publication and integrity decision only and creates no authority over any other person, system, institution, or interpretation.
